

Healing

Pokémon Java allows players to heal their Pokémon during a battle with gold! Although this costs the player a turn and the wild Pokémon still attacks, the player's Pokémon recovers half of its total HP. Isn't that neat?

Please note that although you can continue healing your Pokémon, their health does not increase above 100.

Pokémon Java

Farren and Lily Wang

The Start Screen

In this Pokémon game, you have been captured by Team Rocket and are attempting to escape. From the start screen, you can choose your companion for the game. Start your adventure by running `StartupPanel.java`.

The Map

Here is where you will wander and encounter Pokémon. Use your arrow keys to navigate the map. You will encounter Pokémon walking through the brush and will acquire gold by winning battles.

The Battle Screen

In this screen you can battle wild pokemon with your chosen companion. Select a move and fight to fight, click run to escape, or heal your Pokémon with gold!
